

Ahmed Mansouri

Accomplished Senior Manager at Accenture with over 14+ years of experience leading multi-release, large-scale global business transformation projects. Expertise in Order to Cash (OTC) processes, IT strategy development, ERP transformation, and continuous improvement. Proven track record in overseeing end-to-end OTC processes, driving system implementations, and optimizing operational efficiency. Adept at mentoring teams, managing large-scale projects, and aligning IT functions with business objectives.

**Leadership &
Strategic
Planning:**

Led multiple end-to-end business process assessments identifying improvement opportunities, guiding stakeholders through complex processes, defining key capabilities and building solution roadmaps.

**Deep Industry
Knowledge**

Served many Consumer and Industrial Products clients in the US and Europe. Has a deep understanding of industry business processes, leading practices, legal/regulatory/validated environments, and challenges in the current market.

**Project
Management**

Led several successful deployments in the supply chain and sales and customer service business process areas. Established credibility with clients quickly based on deep business process knowledge and technical expertise. Worked collaboratively to define challenges and determine solution approaches.

**Technical
Expertise**

Deep understanding of the S4 solution with hands-on experience in configuration and solution enablement. Built complex and creative solutions for unique customer requirements, leveraging standard s4 capabilities where possible, including building complex proof of concepts and demonstrating requirements to key stakeholders to ensure business needs are met.

**Representative
Projects**

Order to Cash Functional Lead

Networking, Security and Connectivity Products Client
(9/2023 – Now)

- Leading a diverse team of IT and business professionals, ensuring comprehensive solutioning of OTC processes, including Order Management, Billing, Pricing, and integration both to internal tools and to customers through EDI and the eCommerce platform.
- Driving the adoption of standardized global OTC processes into SAP S/4HANA and ensuring alignment with best practices and organizational goals.
- Collaborating with stakeholders to define requirements, set strategic objectives, and deliver high-impact solutions that enhance scalability and consistency across global operations.

Order to Cash Functional Lead

Disposable Food Container Company
(1/2023 – 9/2023)

- Led multiple workshops across different functions, including order management, billing, pricing and promotions to understand current state of the business and identify opportunities for standardization and potential benefits to migrating to the new S4 ERP.
- Identified simplification opportunities, to reduce customization and complexity in the current IT landscape.
- Developed business case and potential value realization from the implementation of each simplification item
- Estimated deployment effort and timeline for 2 potential deployment models Brownfield or Greenfield

Flavor, Seasonings and Spices Company

(10/2021 – 1/2023)

- Directed a large team of IT and business resources in managing the OTC process, including Order Management, Billing, Pricing, Promotions, Export/Import Processing, and Financial Supply Chain Management.
- Managed multiple 3rd parties included in the solution, including, High Radius, Vistex and Trade Promotion Management
- Led multiple workshops to develop business process designs, identify business requirements and key capabilities
- Implemented a highly integrated architecture solution across multiple systems, including S/4HANA, Vistex, GTS, Trade Promotions Management and High Radius enhancing process efficiency and compliance.
- Supported Solution post deployment and organized knowledge sharing with the support teams.

Project Lead

Multinational Drink and Brewing Company

(7/2020 – 2/2023)

- Oversaw business process assessment and led a comprehensive evaluation of the Order to Cash (OTC) process to identify inefficiencies and opportunities for improvement, benchmarking processes against industry standards to identify and address gaps, focusing on forecasting, planning, and order fulfillment to enhance supply chain efficiency.
- Worked with Stakeholders to Identify key KPIs to improve and establish the scope of the project, fill rate, waste reduction, and transportation costs.
- Developed a clear roadmap with actionable recommendations.
- Created and executed a detailed project approach to Implement strategic improvements to streamline operations and mitigate pandemic-related delays.
- Effectively collaborated with cross-functional stakeholders to influence key decisions, ensuring alignment with business goals and IT strategy. Drove consensus on the implementation of recommended solutions.

Retail Sales & eCommerce Lead

Supercenter Chain

(4/2020 – 7/2020)

- Led a strategic assessment to improve real-time inventory visibility, integrating advanced capabilities such as buy online, pick up in-store (BOPIS) to drive operational efficiency and enhance customer experience.
- Leveraged strong communication skills to build and maintain trust with stakeholders, facilitating effective collaboration and ensuring alignment on project objectives and requirements.
- Evaluated current sales and store operations against leading industry practices, identifying gaps and opportunities for improvement.
- Developed and presented solution options with a rough order of magnitude for implementation, guiding the client through the decision-making process.
- Collaborated closely with the client to design and recommend solutions, focusing on practical implementation strategies and measurable business outcomes to align with the broader OTC strategy.

Scan Based Trading and In Store Operations Lead

Greeting Card Manufacturer

(8/2019 – 3/2020)

- Contributed to the design and optimization of processes within the solution, enhancing efficiency and effectiveness in retail sales and store operations.
- Spearheaded the deployment of a comprehensive retail sales and store operations solution, ensuring alignment with organizational goals and OTC processes.

- Effectively tracked project activities, managing timelines, and ensuring adherence to budgetary constraints. Developed and presented detailed project status reports to stakeholders and senior management.
- Led a cross-functional team through the end-to-end deployment, providing critical input on complex processes and leveraging expertise to mentor and guide junior resources.

Quote and Project Execution Team Lead

Digital Automation and Energy Management Company

(4/2019 – 8/2019)

- Led an end-to-end analysis of the engineer-to-order (ETO) processes, focusing on identifying key areas for improvement within the Order to Cash (OTC) framework.
- Collaborated with stakeholders to establish a capability hierarchy, which served as a foundation for a detailed evaluation of value-added versus non-value-added activities.
- Utilized the capability hierarchy to perform a thorough analysis, pinpointing areas for process enhancement and addressing critical business needs. This analysis was instrumental in driving targeted improvements and aligning processes with strategic objectives.

Solution Architect

Engine and Outdoor Power Equipment

(11/2017 – 4/2019)

- Developed and executed project plans to effectively manage and track multiple concurrent projects in alignment with a global S/4HANA deployment, ensuring seamless integration and execution.
- Created comprehensive release schedules and environment strategies for production support and future releases, ensuring system stability and alignment with business objectives.
- Oversaw the coordination of release activities to support ongoing improvements and scalability.
- Established and enforced a robust change approval process to manage and control changes, serving as a key member of the change approval board.
- Evaluated proposed changes for cross-functional impacts, feasibility, business criticality, and alignment with the global solution.

Order to Cash Process Team Manager

Healthcare, Safety, Industrial and Consumer Products Company

(7/2014 – 11/2017)

- Facilitated comprehensive requirements gathering workshops for Order to Cash (OTC) processes, identifying gaps and refining project scope to ensure alignment with strategic objectives.
- Created detailed work plans that aligned with overall project milestones, managing all phases from planning through deployment and support.
- Efficiently allocated resources to planned tasks, tracked progress against project milestones, and adjusted as needed to maintain alignment with project timelines and deliverables.
- Proactively managed project risks and drove issues to resolution, ensuring minimal disruption to project progress and maintaining focus on achieving project objectives and compliance with governance standards.

Automotive EDI Specialist

Industrial Products Company

(3/2013 – 6/2014)

- Designed comprehensive end-to-end Order to Cash (OTC) processes for automotive clients, focusing on integrating Electronic Data Interchange (EDI) to streamline customer demand management.

- Implemented Forecast and Just-In-Time (JIT) messaging with scheduling agreements to enhance demand planning and forecasting accuracy, improving overall supply chain efficiency.
- Developed and enabled self-billing processes, including defining customer-specific requirements for labeling and advance ship notices. Streamlined self-billing operations to ensure accurate and efficient invoicing.

Project Test Lead

Financial Services Client

(6/2012 – 12/2012)

- Developed and executed comprehensive test plans, ensuring robust testing procedures aligned with project requirements and business objectives.
- Led the management and triage of defects, prioritizing and addressing issues to minimize impact on project timelines and system performance.
- Regularly communicated testing status, progress, and issues to program leadership, providing critical updates and insights to support informed decision-making and maintain project alignment.
